

The Wald Street Journal

City of Waldport

10/21/2016

Edition 2, Volume 1

Welcome!

Welcome to the second edition of our monthly publication. The gremlins have been hard at work this month to delay the publication, hence the lateness of the newsletter. We're going to try aiming for the end of the month

and see how it goes.

You are always welcome contact us with suggestions. Also, if you ever have any questions or would like additional information, by all means let us know!

Did you know that making simple changes to your water usage habits can have a positive impact on your bill? Shutting the water off while washing dishes, brushing teeth or washing hands can save upwards of 35 gallons of water per person per day! That can really add up over a month's time....

Meet the Staff

This month's featured employee is Public Works Director Scott Andry. Scott has been Director since May of 2014, and is responsible for overseeing the efforts of the department that keeps your water running, your toilets flushing, and your streets (relatively) pot-hole free. He is proud of his crew and the quality of their work, and so are we!

News from the Library

The Waldport Public Library now has a new Director! Susan (Sue) Bennett started on October 3, and has already attended her first Library Board meeting. She brings a great deal of experience to the position and is looking forward to expanding the offerings at the Library, especially for some of us older folk. So stop by the Library and give her a warm welcome to our community!

Upcoming Events

October 31 – Halloween (and a Waldport Planning Commission meeting at 2:00 p.m. at City Hall)

November 8 – Election Day. Let your voice be heard!

November 10 – City Council Meeting – 2:00 at City Hall

November 11 – Veteran's Day. City offices will be closed, but the Library will be open.

November 24 – Thanksgiving. City offices will be closed on the 24th and 25th. We will reopen on November 28 at 8:00 a.m.

In Other News....

The Public Works crew will be continuing their smoke testing on the sewer system in the next few weeks. This helps them locate leak areas and other problems in our infrastructure. The product they use to do this is a liquid smoke, which is non-toxic and harmless to plants, animals and people.

For your information, here's a reference chart for typical household water usage.

Let us know how we're doing – you can find more information on the City by visiting our website at: www.waldport.org and/or follow us on Facebook!
